Lower Site: Nunnery Lane, York, YO23 1JG \* Tel: (01904) 647877 \* Email: [lsreception@allsaints.york.sch.uk](mailto:lsreception@allsaints.york.sch.uk) \* Website: [www.allsaints.york.sch.uk](http://www.allsaints.york.sch.uk)

Our Ref: SKE/ABAX

10 March 2021

Dear Parent/Carer

Up to one in three people who have COVID-19 are asymptomatic and can spread the virus without knowing. To help to reduce the spread of the virus we need to identify those individuals.

[The Government recently announced that all secondary and college aged students will be offered lateral flow testing prior to their return to school.](#) Following the initial testing phase, we are asking students to carry out tests at home twice every week, 3-5 days apart to help make the return to school safer for everyone.

## Testing students at home

Students will be able to collect their home test kits as per the schedule below:

<u>Year Group</u>	<u>Date</u>	<u>Pick up Location</u>	<u>First test at home</u>
Keyworker children	Wednesday 10 March	RI - after their 3 <sup>rd</sup> test in school	Sunday 14 March
Year 7	Tuesday 16 March	Lower School Hall	Wednesday 17 March
Year 8	Wednesday 17 March	Lower School Hall	Thursday 18 March 2 <sup>nd</sup> test Sunday 21 March
Year 9	Friday 12 March	RI - after their 3 <sup>rd</sup> test in school	Wednesday 17 March
Year 10	Thursday 11 March	RI - after their 3 <sup>rd</sup> test in school	Sunday 14 March
Year 11	Friday 12 March	RI - after their 3 <sup>rd</sup> test in school	Wednesday 17 March
Year 12	Thursday 11 March	RI - after their 3 <sup>rd</sup> test in school	Sunday 14 March
Year 13	Tuesday 16 March	Upper School Main office	Wednesday 17 March

Compassion

Truth

Respect

Forgiveness

Justice

Service

Gentleness

Humility

Stewardship

Tests are free of charge. Students will receive 2 packs of 3 tests in a box with a leaflet explaining how to take the test and report the results.

### **Taking the test**

Students should continue to take a test twice a week on **Sunday and Wednesday evenings until further notice**. We will give students a leaflet with instructions on how to do the test with the kit. There is also a useful video to show you how to take the test [here](#).

[Help and support is available](#), including instructions in different languages on how to test and report the results and a video showing you how to take the test.

**If the test is void, you will need to repeat the test** and report both results to the NHS Test and Trace website.

There is no need to keep used test equipment after the test result has been reported. You can put it in your normal bin (household waste).

### **Reporting your test results**

You need to report your result to **both NHS Test and Trace and your school**.

NHS Test & Trace self-report website: <https://www.gov.uk/report-covid19-result>.

You should report the result of every test to school using the QR code below which will link you directly to a Google Form. This QR code will also be shared on the school website for your reference.

### **What should you do after the test?**

If a student tests positive **your household and any support bubbles you are part of** should self-isolate immediately in line with NHS Test and Trace guidance. You should then [book a confirmatory PCR test](#) for the student at the earliest opportunity. You will need to continue to self-isolate until the results of

the PCR test are confirmed. Please send a copy of any PCR test results into school ([covid@allsaints.york.sch.uk](mailto:covid@allsaints.york.sch.uk)) for our records.

A negative result does not guarantee that you are not carrying the virus. So you should continue to follow social distancing, and other measures to reduce transmission such as wearing a face mask and regularly washing your hands.

**This does not replace symptomatic testing. If you or anyone in your household develops symptoms of the virus you should follow [National guidelines on self-isolation and testing](#).**

### **Why take part**

Taking part in testing is voluntary, all students will be able to attend school whether they take part in testing or not.

I am strongly encouraging all students to take part. Testing at home will allow your child and other students to attend school as safely as possible.

Please contact [covid@allsaints.york.sch.uk](mailto:covid@allsaints.york.sch.uk) if you have any questions or concerns about home testing.

Thank you for your support.

Mrs S L Keelan Beardsley

**HEADTEACHER**

# Some frequently asked questions about Home Testing

## Do I need to give consent?

Students and parents do not give written consent to take part in the home testing programme. Please read the information below on how personal information and test results are shared and the privacy notice attached to this email.

Once you open the kit you should take and report the results of the tests to NHS Test & Trace and school, regardless of the result (positive, negative, or void).

## Can my child take the test themselves?

Students aged 18 and over should do the test themselves and report the result, with help if they need it.

Students aged 12-17 should do the test themselves with adult supervision. The adult may help the student to take the test if they need support.

Students aged 11 should be tested by an adult and the adult must report the result.

## Reporting problems or issues with testing

If there is an issue with the test kit, for example something is missing, please report it by calling **119** and please also tell the school.

If an accident or injury happens whilst using the test kit, please seek medical care by calling 111 (or 999 if it is an emergency). Please also report what happened using this website: <https://coronavirus-yellowcard.mhra.gov.uk/>

## What type of tests will be used?

We will be sending home Lateral Flow Device (LFD) tests. They are a fast and simple way to test people who do not have symptoms of COVID-19, but who may still be spreading the virus.

The tests are easy to use and give results in 30 minutes.

Further information: <https://www.gov.uk/guidance/understanding-lateral-flow-antigen-testing-for-people-without-symptoms>

## Are LFD tests accurate?

Lateral Flow Devices identify people who are likely to be infectious. These individuals tend to spread the virus to many people and so identifying them through this test is important.

These tests have been widely and successfully used to detect COVID-19 in asymptomatic individuals and are approved by the Medicines and Healthcare products Regulatory Agency (MHRA). The speed and convenience of the tests supports the detection of the virus in asymptomatic individuals, who would not otherwise have got tested.

The tests are highly specific, with low chance of false positives. They are also very sensitive and are able to identify the majority of the most infectious yet asymptomatic individuals. Extensive evaluation has been carried out on the tests and it shows that they are both accurate and sensitive enough to be used in the community for screening and surveillance purposes.

It is important to remember that these tests are only an aid to help stop the spread of the virus and you should continue to follow other guidance such as on wearing face coverings and social distancing.

### **How are LFD tests different to PCR tests?**

There are 2 main types of test to check if you have coronavirus:

- polymerase chain reaction (PCR) tests check for the genetic material (RNA) of the virus in the sample - you send the sample for processing at a lab
- lateral flow device (LFD) tests detect proteins called 'antigens' produced by the virus

LFD tests give rapid results, in 30 minutes after taking the test.

### **What does it mean if my child has a positive result?**

If your child has a positive antigen LFD test result they, their household and any support bubbles they are part of should self-isolate immediately in line with NHS Test and Trace guidance for 10 days. You need to report your result to both NHS Test & Trace and your school.

You should order a confirmatory PCR test if you are testing at home (confirmatory PCR tests are not needed if the test was conducted at the Asymptomatic Test Site at school).

You can [book a test here](#).

### **What does it mean if my child has a negative result?**

A negative result does not guarantee that your child is not carrying the virus. So, you should continue to follow social distancing, and other measures to reduce transmission such as wearing a face mask and regularly washing your hands.

### **What if my child has a void result?**

If the result of the test is unclear (void), they should take another one. If the next test is also void, your child should take a PCR test. You can [book a test here](#).

**All test results need to be reported to both NHS Test & Trace and school.**

### **Do I need to send the test to a lab?**

No. The LFDs supplied do not need to be sent to a laboratory to get a result and can give a quick result in around 30 minutes. Guidance on self-testing is contained in the 'Instructions for Use' leaflet, which comes with the test kit. There is also a useful video to show you how to take the test [here](#).

## **How do you report the result?**

If it is positive, negative or void using this [service](#). You also need to tell the school the test result. You will receive a text or email from NHS Test & Trace confirming that you have reported your test result.

**All test results need to be reported to both NHS Test & Trace and school.**

## **Can I or someone else in my household use a test kit sent home from school?**

No, however whole families and households with primary school, secondary school, and college age children, including childcare and support bubbles, will be able to test themselves twice every week from home. This testing can be accessed through the following channels:

- get a rapid test at work, through workplace testing. Ask your employer for more information
- attend a test site to get tested where you will be able to see how to take the test or pick up tests to do at home (you can find your nearest test site via the postcode checker [www.gov.uk/find-covid-19-lateral-flow-test-site](http://www.gov.uk/find-covid-19-lateral-flow-test-site) or check your local council website)
- collect tests to do at home, find your nearest collection site [COVID Test Finder \(test-and-trace.nhs.uk\)](https://www.gov.uk/covid-19-test-finder)

If these options are not possible, there will be a supply of rapid tests for order online for people who need them the most. More information can be found on [www.gov.uk/order-coronavirus-rapid-lateral-flow-tests](http://www.gov.uk/order-coronavirus-rapid-lateral-flow-tests)

There is [more information available about testing for households and bubbles of students](#).

## **How will personal information and test results be shared?**

When your child takes a Lateral Flow test, you need to report the result. This is so that their test result can be traced, which means that you need to share some information about your child.

You need to tell the Department for Health and Social Care (DHSC):

- your child's name
- your child's test result
- the reference number on the test Kit

You will also need to tell your child's school or college their test result.

Under UK law, your child's school or college can collect and store test result data because it is in the 'public interest'. This means that your child's data helps us to stop the spread of the virus, and to keep your children in school. For example, we will tell your child to self-isolate if they get a positive test result.

Schools and colleges will only share information with the Department of Health and Social Care (DHSC) if the test kits used are found to be faulty. If this happens, DHSC will use our information to contact people who used the faulty tests, so that they can be tested again. This will ensure that testing is accurate and helps keep us all safe.

When you report test results online, you are sharing information with DHSC. They may share the information with your GP, local government, NHS, and Public Health England. This is so that they can offer your family health services and guidance if your child needs to self-isolate. They might also use your child's data anonymously (without their name or contact information) to research COVID-19, and improve our understanding of the virus.

For more information on how personal data is used for testing please see the detailed privacy notice attached to this email.
